## A DAY OF NO VALUE

### KEY QUESTIONS

1. Can the patient care or interventions received today be delivered at HOME or in a non-acute setting?  
**YES – It's a RED DAY**
  2. If I saw the patient in an outpatient setting, would their current 'physiological status' require an emergency admission? **NO – It's a RED DAY**
- Inadequate MDT presence at the Board Round to allow firm decisions to be made.
  - The care or interventions the patient is receiving today could be delivered in a non-acute setting.
  - Tests and investigations have occurred but the results have not been reviewed by the Medical team and acted upon.
  - A planned investigation, clinical assessment, discharge assessment or therapy intervention for today does not occur.
  - Acute - The medical care plan lacks a Senior Medic approved expected date of discharge.
  - Acute - The patient is a new admission and has not yet had a medical review/there is no initial diagnosis/treatment plan.
  - If a patient is due for discharge today and the discharge prescription medications are not ready (Pathways of Care Delay).
  - Transport delaying discharge or causing plans to fail today.

## A DAY OF VALUE

- Patient progresses towards discharge
- Everything planned and requested is done
- Patient needs this bed for Acute care
- Everything that was planned for today gets done
- The patient requires acute hospital care
- The patient requires community hospital care
- The results from tests and investigation have been reviewed by the Medical team and acted upon
- The patient is receiving active interventions to get them to be discharged by tomorrow, and the discharge prescription medications are ready by the evening before the expected date of discharge.
